

**WE ARE HERE
BECAUSE
WE HAVE APPETITE**

Tor Nørretranders

MAD 2 Symposium
Refshaleøen, København, July 1-2, 2012

Kindergarden

Everything is everywhere

Go look

Eat together

Everything is
everywhere

Everything is everywhere

First approximation:

**There is everywhere
something to be found**

The world is edible

Everything is everywhere

Old first approximation:

The is only something
to be found in supermarkets

The world is a desert

Everything is everywhere

The Old World:

Food – from plastic trays

Water – from pipes

Energy – from oil and gas

Everything is everywhere

The Real World:

Food – everywhere

Water – everywhere

Energy – everywhere

Everything is everywhere

Old:

Depots in a desert

New:

Flows on a planet

Everything is everywhere

Why didn't we know?

Everything is everywhere

We did not look for it!

Everything is everywhere

Why didn't we look?

Everything is everywhere

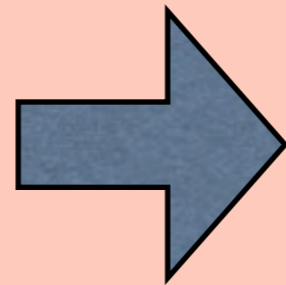

**We thought the world
was an unfriendly place
– a desert unkind to us**

Everything is everywhere

**We thought we had to
take control to survive**

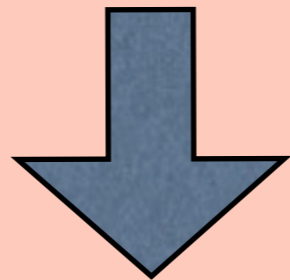

10.000 years ago:

Hunter-gatherers

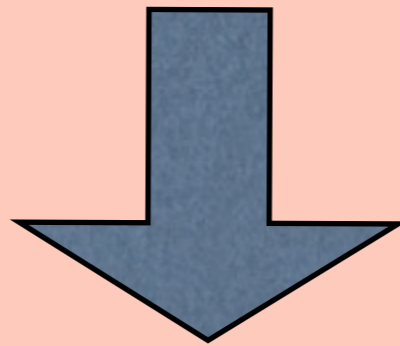

Farmers

**Manifold of
fish, animals and plants**

**Very few
fish, animals and plants**

Wild

Tame

Domestication

Plants domesticated into cultivated plants

Animals tamed and domesticated

FAO:

**60 % of the calories
consumed by human beings
come from only four crops:
*rice, wheat, corn and potatoes***

90% from just 30 crops

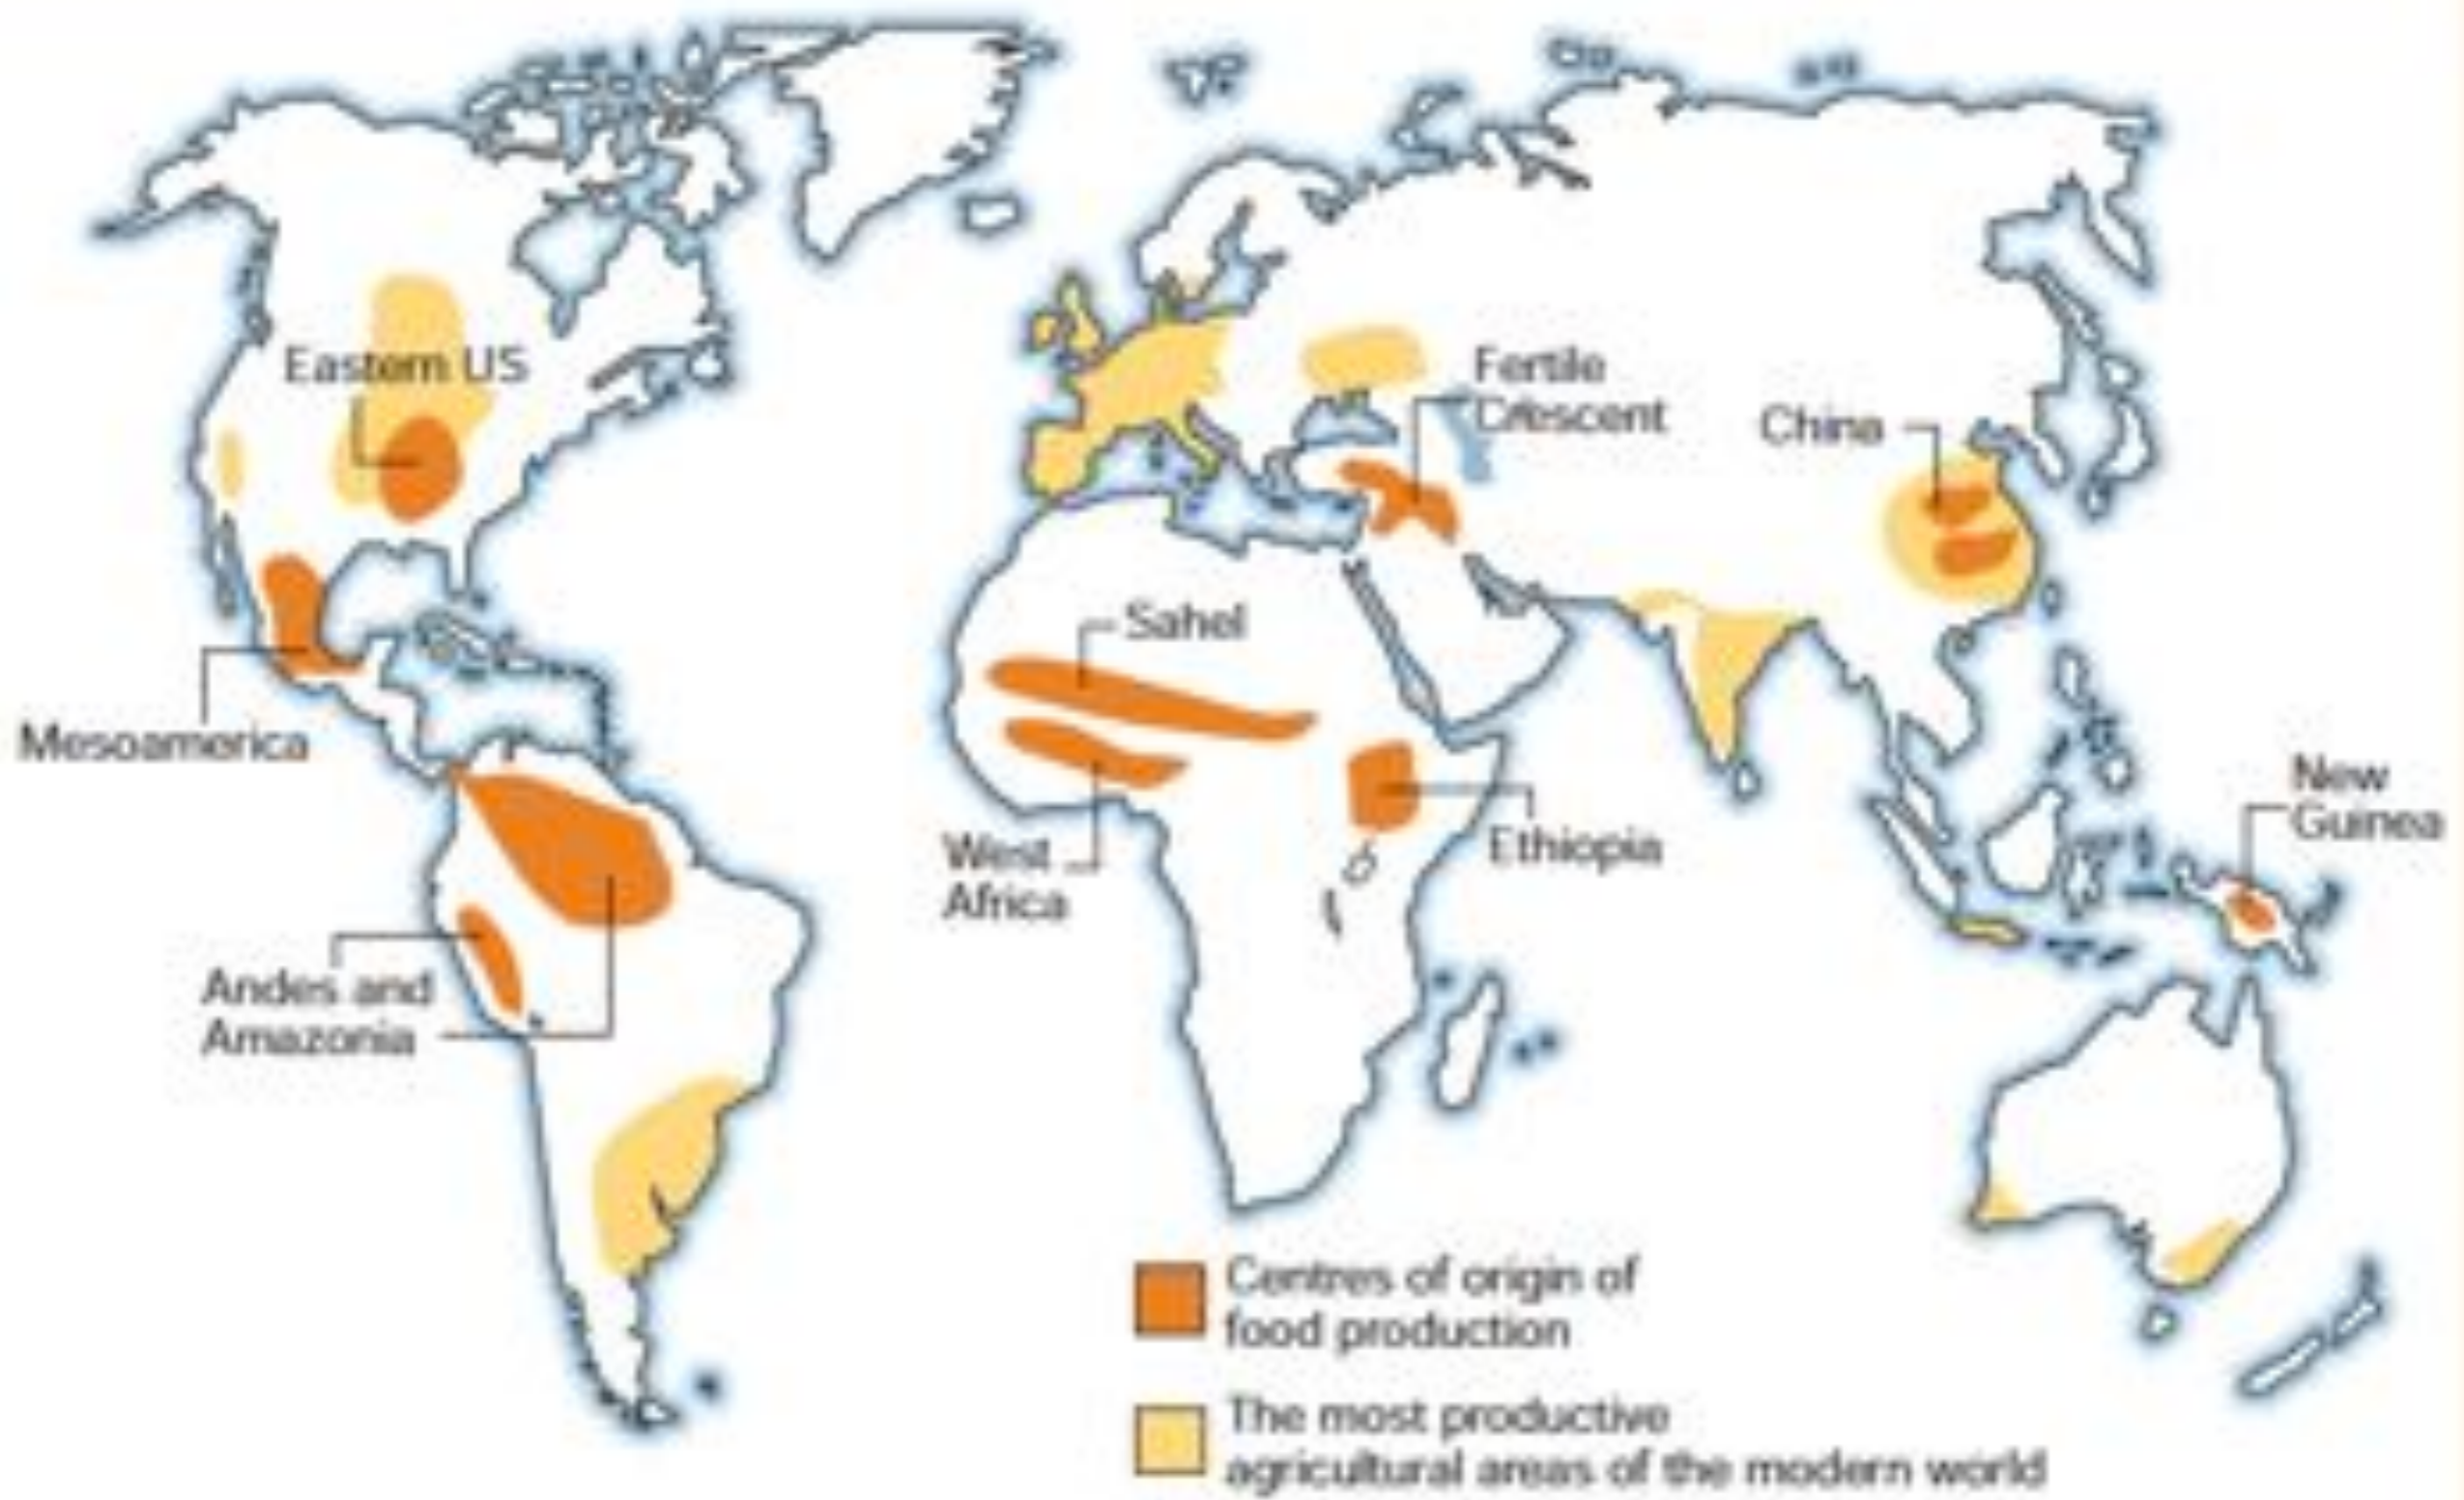

The sad story of vegetation and gastronomy

1. We eat so few species

2. Your skills are used mostly
in making a few dull things
somewhat varied and interesting.

All gastronomy
has been about
making something
poor seem rich

**Ironically,
the world *did*
become a desert**

**We lost faith
in the planet**

**We took control
over everything**

We lost our way

We forgot

A Kind Garden

Kindergarden rules!

Everything is everywhere

Go look

Eat together

Go look

Go look

Plenty of offerings out there

Plenty of need in here in me

Go look

Appetite

Go look

Trust the world,
search the world,
learn your skills,
be clever & careful

Go look

**Trust your senses,
sense the world,
learn your way,
be curious & skillful**

Go look

Dare

Go look

Care

Go look

Share

We forgot

Kindness

Kindergarden rules!

Everything is everywhere

Go look

Eat together

Eat together

Eat together

**Go forage, go hunt,
come back and share**

Eat together

The more you share,
& the more you care
– the more you get

We forgot

Akin

to the garden

Go with the flow:

6 ton
of matter
per year

Floww

Ecosphere

ALGAE

SHRIMPS

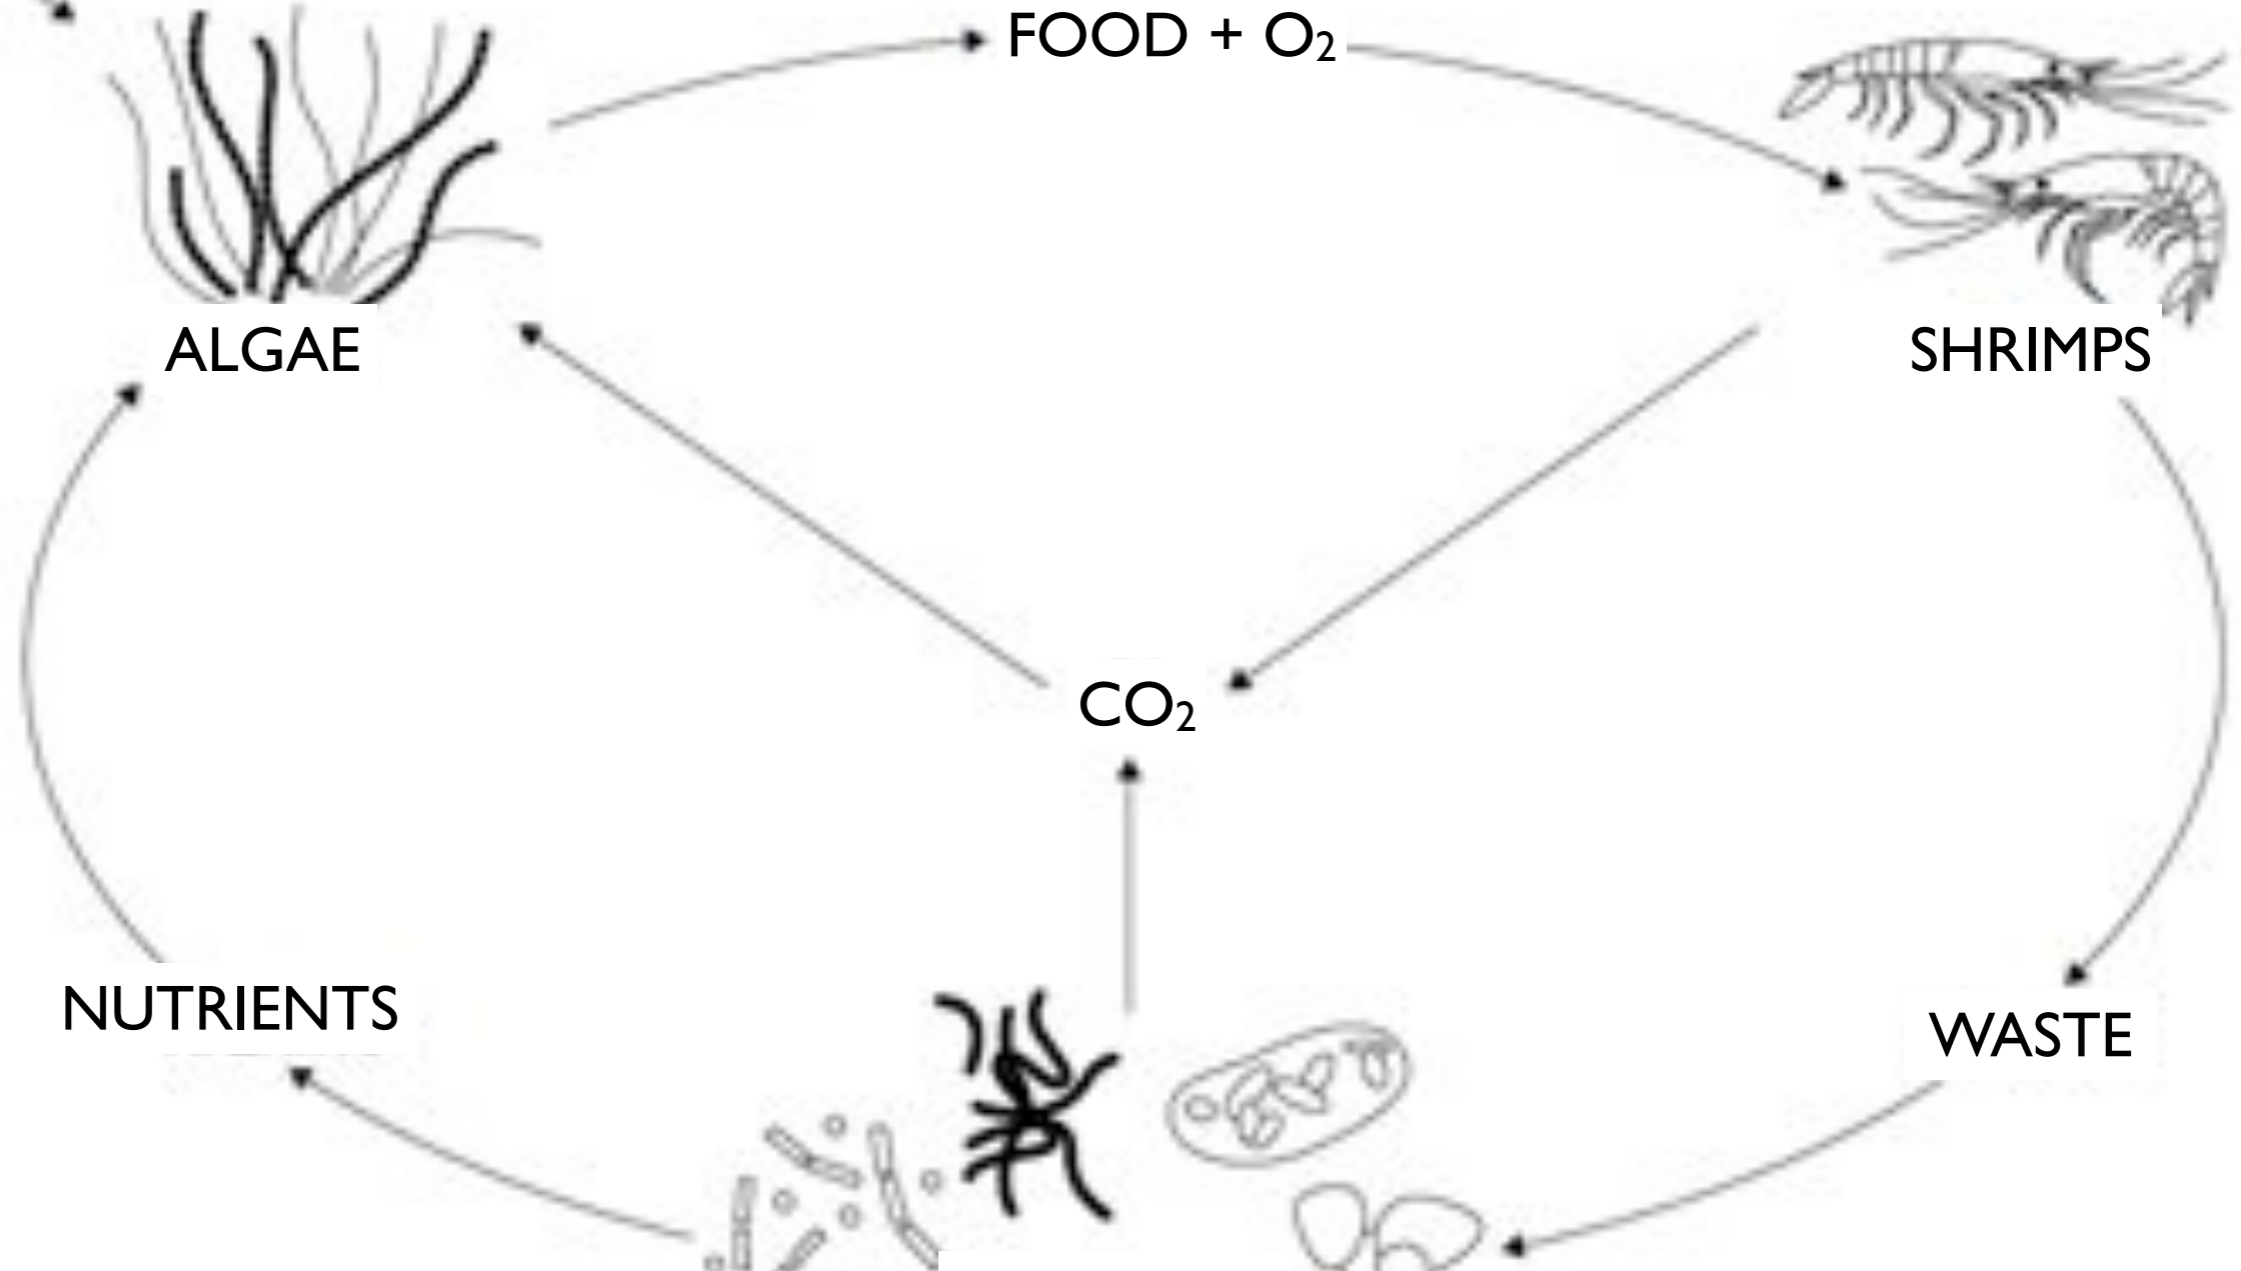

BACTERIA

FOOD + O₂

CO₂

NUTRIENTS

WASTE

PLANTS

FOOD+O₂

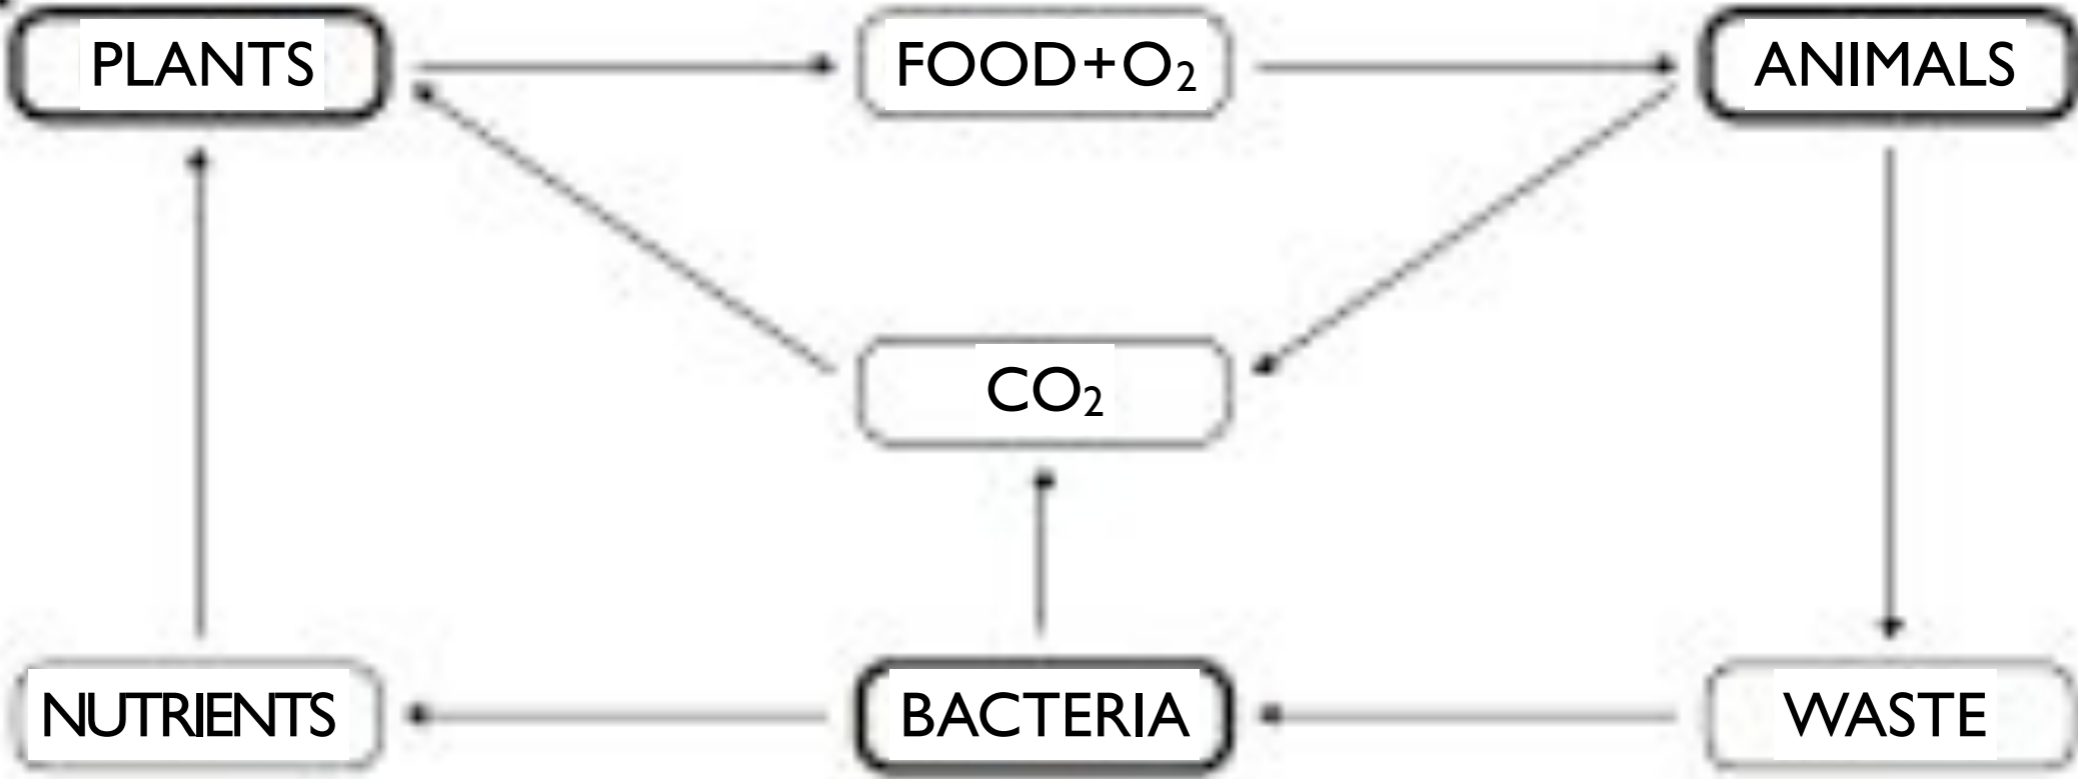

ANIMALS

CO₂

NUTRIENTS

BACTERIA

WASTE

Plants need animals

The planet needs us

We belong here

We are natives

... but we forgot
and nobody told
the new natives

We Are Here

(Our kind)

All of our ancestors made it:

**An unbroken chain
of survival**

No promises,
but confidence:

**They made it –
we can make it**

**WE ARE HERE
BECAUSE THEY
HAD APPETITE**

WE ARE HERE

BECAUSE WE

HAVE APPETITE

We are the generation to make the change:

Regain your appetite
for planet Earth

Do not control depots in a desert

Explore the richness of the garden

The greatest change of direction
in 10.000 years
is just about to happen

**A milestone in
evolution on Earth**

The cutting edge of evolution

The cutting edge of evolution

Chefs with their
sharp knives

This is a kind
kind of world

Be kind
